Study Details

Requesting Doctor

Requesting doctor is required.

Scan Date

mm/dd/yyyy

Study Purpose

Location

Location is required.

Clinical Notes

Clinical information such as symptoms, observations, medical history, and areas of interest. These notes will appear on the report.

Private Notes to Radiologist

Is there anything else you want the radiologist to be aware of when reviewing this imaging? These notes will not appear on the report.

Upload Files

ADD

Drop files here

Please upload CBCT scans in DICOM format(.dcm).

With many CBCT platforms, each slice of the scan volume is a unique DICOM file resulting in hundreds of files per scan. Please do not add individual slice files to the upload window. Instead, zip the scan folder on your computer and add it, or drag the scan folder icon into the upload window and the system will zip it for you.

SUBMIT

You can press Submit before the files have completed the upload process. Don't close the browser tab, they will continue uploading in the background.

Requesting Doctor: Use the drop down menu to select the doctor that is clinically treating the patient.

Study Purpose: Follow instructions as prompted. If 'Implant' is chosen, a tooth chart will appear. You may click the teeth in the region of interest.
Note: If you wish to have measurements provided, please leave the box in the upper right checked. Be aware that charges will accrue for more than two sites. By unchecking the box, the radiologist will understand you do not need to have the measurements included on the report.

Location: Please choose the location where the patient is being treated.

Select Files: Allows you to browse to your desktop (or to where you stored the folder with the patient dicom files exported from your CBCT instrument. Or you may simply drag and drop the folder here to upload. Note: you do NOT need to zip this folder!

All done - Submit and follow instructions!

Congratulations, your case has been submitted with Case ID: XJ00XJ00X.

We'll let you know if we have questions and we'll get your results to you soon.
